

~ Safety practices for pedestrians ~

Walking is good for your health, and it's good for the environment, too. But before you head out, we want to remind you of some important safety tips.

Be smart and alert

- It's safest to walk on a sidewalk, but if one is not available, walk on the shoulder and face traffic
- Avoid distractions such as electronic devices that take your attention off the road
- Stay sober; walking while impaired increases your chance of being struck

Make yourself visible at night

- Wear light / bright colored clothes
- At night, carry a flashlight and wear reflective material
- Cross the street in a well-lit area

Look before you step

- Know and follow traffic rules, signs and signals
- Cross streets at marked crosswalks or intersections, if possible
- Don't assume vehicles will stop. Make eye contact with driver before crossing
- Watch for turning vehicles. Make sure drivers see you before crossing

Safety is always a priority for our residents and visitors

**Please stop by Sullivan's Island town hall front or ask one of our police officers
for a free reflector / flash light clip**
